SUMMARY

A motivated Computer Science graduate who enjoys building practical software and experimenting with machine learning models. I have hands-on experience developing ML solutions and backend web applications using Python and Flask, and I am comfortable working with data, models, and core CS fundamentals. Currently seeking an entry-level Software Engineer, Backend Engineer or Machine Learning role where I can learn fast and contribute to real-world products.

TECHNICAL SKILLS

Languages: Python, C++, HTML, CSS
Frameworks & Libraries: Flask, Bootstrap, Django (Beginner), Scikit-learn, Pandas, NumPy, OpenCV
Machine Learning & Deep Learning: Supervised Learning, Unsupervised Learning, Classification, Feature Engineering, Model Evaluation, CNN, RNN, LSTM
Digital Image Processing: Image preprocessing, filtering, feature extraction
Databases: MySQL, SQLite
Tools: Git, GitHub, Linux (basic)
CS Fundamentals: DSA, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

Predictive Modeling for Early Diabetes Detection (Machine Learning)
• Developed machine learning models using Logistic Regression and Decision Tree to predict diabetes at an early stage.
• Performed data preprocessing, feature analysis, and model evaluation using Python and Scikit-learn.

Sukun – AI Journaling Web App | Flask, TinyLLaMA
• Built an AI-powered journaling assistant with mood detection and markdown-based editor.
• Integrated TinyLLaMA via Ollama and designed a responsive interface using Tailwind CSS.

Golpokotha – Mini Blog Web App | Flask, Bootstrap, CSS
• Developed a blog platform where users can create profiles, publish posts, and interact with other users.

File Manager Desktop Application | Python, Tkinter
• Implemented core file operations including copy, move, zip/unzip, rename, and delete.

RESEARCH EXPERIENCE

Undergraduate Researcher — Machine Learning
• Conducted research on sarcasm detection in the Bengali language using machine learning techniques.
• Co-authored a review paper on applications of machine learning in genomics.
• Responsibilities included literature review, dataset analysis, experimentation, and result interpretation (papers unpublished).

EDUCATION

BSc in Computer Science & Engineering
Shanto-Mariam University of Creative Technology
2026 | CGPA: 3.74/4.00

Higher Secondary Certificate(HSC)
National Model College
GPA: 4.33/5 Group: Science

Secondary School Certificate(SSC)
Arun Chandra High School
GPA: 4.67/5 Group: Science

EXPERIENCE

Content Writer — Prattohik.com (2023–2024)
